Subject: Another Wetland Project in Hardin County

Hi Becca

Attached is a set of plans for a wetland project in Hardin County. It is located in Drainage District 55 and Joint District 55 and 3 on the north side. We are wanting to make modifications to the tile as shown on the plans to daylight them into the wetland for nitrate reduction. The landowners have agreed to this project and we are wanting to get approval from the County to proceed with this project and plan to bid this project for construction in February 2020. Please let me know what we need to do at this time. Thanks for your help.

Also, when you get a chance, can you forward the meeting minutes to me for the other wetland project in Hardin County with Steve Perry. Thanks.
