# **Supplement to Engineer's Report on Improvements To the Main Tile, Drainage District No. 3 Hardin County, Iowa**

## **1.0 INTRODUCTION**

- **SCOPE OF WORK** – The District Trustees, requested Clapsaddle-Garber Associates to investigate and report concerning improvements to the Main Tile of Drainage District No. 3. At the Public Hearing for the Engineer's report on repairs or improvements to Main Tile of Drainage District 3 held on August 16, 2021, the original Engineer's Report was discussed and reviewed by the District Trustees. As a result of this meeting, the District Trustees requested Clapsaddle-Garber Associates to move ahead with a supplemental report concerning reversion of a portion of the Main tile back to an open ditch.
- **LOCATION** – The area of investigation was limited to a portion of Main tile. Said Main tile is located in Sections 26, 27, and 35, Township 89 North (T89N), Range 21 West (R21W), Hardin County, Iowa. Specifically, the downstream limit of investigation for the Main tile is from the tile outlet in Section 35 approximately 70 feet south of 150<sup>th</sup> Street and 400 feet east of JJ Avenue. Going upstream, the tile then proceeds northwesterly and then crosses 150<sup>th</sup> Street approximately 220 feet east of JJ Avenue. The tile then continues northwesterly across Section 26 then crosses JJ Avenue approximately 75 feet north of 150<sup>th</sup> Street. The tile then continues northwesterly for approximately ½ mile across Section 26 before turning westerly across Section 27, approximately ¼ mile west of JJ Avenue and a ⅛ mile south of 140<sup>th</sup> Street. The tile then proceeds westerly across Section 27 for approximately ½ mile before turning northwesterly, with the upstream limits of the investigation ending at the south railroad right of way in Section 27, approximately ¾ mile west of JJ Avenue and ⅛ mile south of 140<sup>th</sup> Street. For reference, a map showing the limits of investigation is included in Appendix F.

2.0 **INVESTIGATION** – The field investigation for this report was performed at the request of the Drainage District Trustees. Said investigation was limited to visual observation only along with survey data and pictures gathered. No tile blowouts could be located as the entire length of the investigation area was covered with tall vegetation, hindering the investigation. For reference, a copy of the pictures is included in Appendix E and a map showing the investigation limits is included in Appendix F.

3.0 **IMPROVEMENT METHOD** – To improve the drainage capacity for the existing Main tile, the following option is the most straight forward available:

**Open Ditch**

- Remove and replace  $5,682\pm$  feet of the Main tile with a Main Open Ditch.
- Typically, the Main Open Ditch would be in the same location as the existing Main tile in order to locate and outlet private tile and district lateral tile. For reference, the route and locations are shown on the map included in Appendix F.
- Outlet all private and lateral tile encountered to discharge into the Main Open Ditch.

With the above-mentioned possible improvement, the following should be noted in addition to the notes in repair methods section:

- This option would probably involve obtaining of right of way.
- The replacement of the Main tile with a Main Open Ditch increases drainage capacity, which has traditionally fit the Iowa Code definition of improvement. However, the replacement is not being suggested to increase drainage capacity, but is being offered solely to extend the lifecycle of the district facility and the original design for the Main in this area was an open ditch. Legal counsel should be consulted to provide advice concerning this.
- If this option is deemed a repair by legal counsel, repairs have historically been viewed as not having an impact on jurisdictional wetlands. As such, individual landowners should consult with applicable staff at the Hardin County NRCS offices to verify the existence of said jurisdictional wetlands and that there will be no impact on them.
- If this option is deemed an improvement by legal counsel, improvements have historically been viewed as having an impact on jurisdictional wetlands. As such, individual landowners should consult with applicable staff at the Hardin County NRCS offices to verify the existence of said jurisdictional wetlands and what said impact may be on them.

If legal counsel considers the above option a repair, it is our opinion that the following is applicable. A hearing will be required. Per Iowa Code Chapter 468.126.1.g, the right of remonstrance does not apply to the proposed repairs.

If legal counsel considers the above option an improvement, it is our opinion that the following is applicable. A hearing will be required. Per Iowa Code Chapter 468.126.4.e, the right of remonstrance may apply to the proposed improvements.

4.0 **OPINION OF PROBABLE CONSTRUCTION COSTS** – Using the above method of improvement, an itemized list of project quantities and associated opinions of probable construction cost for each option were compiled and are included in Appendix G of this report. A summary of said costs are as follows:

METHOD	TOTAL COST	CONSTRUCTION COST	ROAD CROSSING COST
Improvement - Open Ditch	\$1,330,240.94	\$466,490.31	\$863,750.63

It should be noted that said costs include materials, labor, and equipment supplied by the contractor to complete the necessary repair or improvement and include applicable engineering, construction observation, and project administration fees by Clapsaddle-Garber Associates. However, said costs do not include any interest, legal fees, county administrative fees, crop damages, other damages, previous repairs, engineering fees to date, wetland mitigation fees, or reclassification fees (if applicable). As always, all costs shown are opinions of Clapsaddle-Garber Associates based on previous lettings on other projects. Said costs are just a guideline and are not a guarantee of actual costs.

5.0 **RECOMMENDATIONS** – There is a need to perform the above-mentioned actions. The actions would remove the current restrictions to the Main tile and extend the lifespan of the same. Therefore, it is recommended that the District Trustees, should take action to accomplish the following:

- Approve the Supplement Engineer's Report as prepared by Clapsaddle-Garber Associates.
- Seek advice from legal counsel as to whether the Open Ditch is a repair or improvement.
- Hold the required hearing on the proposed improvement.
- Adopt of the recommendations of the Supplement Engineer's Report.
- Seek advice from NRCS and the County Engineer to see if an alternate route from the Main Open ditch around the intersection of JJ Avenue and 150<sup>th</sup> Street is acceptable.
- Direct plans and specifications for the proposed improvement be prepared by Clapsaddle-Garber Associates.
- Proceed with receiving bids from interested contractors by Clapsaddle-Garber Associates.
- Award contract to the lowest responsible contractor.
- If desired or required by Iowa Code, proceed with reclassification proceedings after seeking legal advice concerning the same.

# **Engineer's Report on Repairs and Improvements To the Main Tile, Drainage District No. 3 Hardin County, Iowa**

## **1.0 INTRODUCTION**

- **SCOPE OF WORK** – The District Trustees, requested Clapsaddle-Garber Associates to investigate and report concerning repairs and improvements to the Main Tile of Drainage District No. 3. This report will detail the feasibility of said repairs and improvements, and present opinions of probable construction costs associated with said repairs and improvements. In November 2020, the District Trustees requested Clapsaddle-Garber Associates to move ahead with an investigation and report concerning repairs and improvements to the Main Tile after deficiencies had been identified.
- **LOCATION** – The area of investigation was limited to a portion of Main tile. Said Main tile is located in Sections 27 and 28, Township 89 North (T89N), Range 21 West (R21W), Hardin County, Iowa. Specifically, the downstream limit of investigation for the Main tile is upstream of the railroad right of way in Section 27 approximately  $\frac{1}{2}$  mile west of I Avenue and  $\frac{1}{2}$  mile south of the 140<sup>th</sup> Street. Going upstream, the tile then proceeds northwesterly for a short run before turning southwesterly across Section 27. It crosses I Avenue approximately 1 mile south of 140<sup>th</sup> Street. The tile then continues southwesterly across Section 28 for  $\frac{1}{4}$  mile and then turns westerly, with the upstream limits of the investigation being approximately  $\frac{1}{4}$  mile west of I Avenue. For reference, a map showing the limits of investigation is included in Appendix B.

2.0 **DISTRICT HISTORY** – The following is a brief summary of the pertinent history of Drainage District No. 3 as obtained from the Hardin County Engineer's Field Books and the Hardin County Auditor's drainage minutes and records.

- 1906, Mar. 5      Original petition filed in the County Auditor's Office.  
1906, Aug. 7-14     "The Iowa falls Sentinel" published Notice of petition.  
1906, Sept. 4       Hearing  
1906, Oct. 13       "THE SEMI-WEEKLY HERALD" published Notice for Drain District.  
1906, Nov. 12       Hearing for damages  
1907, Jan. 21       Amended and substituted petition was filed for a Drainage District No. 3.  
1907, Feb. 2       Engineer's Report by Geo L. Mecham was filed.  
1907, Nov. 7       Board of Supervisors - resolved to establish Drainage District No. 3.  
1908, Mar. 4       Board of Supervisors rerecorded November 7, 1907 minutes, proceedings, and resolutions to fix errors in the establishment of Drainage District No. 3.  
1908, Mar. 20       Commissioner Report of the permanent survey of Drainage District No. 3  
1908, Apr. 23       Notice to Contractors for construction of Drainage District No.3 - Total Cu.Ydr. 209,654.  
1908, Jun. 28       C.H. Sternbery & Sons Drainage Contractors bid submitted.  
1908, Jun. 30       Indiana Drainage County bid submitted.  
1908, Jul. 22       Northern Construction Company request to withdraw bid  
1908, Jul. 23       Letter from County Auditor's Office to Elkhart Ind. stating they could not consider their bid.  
1908, Oct. 14       Notice of assessment for Drainage District No. 3.  
1908, Nov. 9       Awarded Construction Contract to Dilley & Berdine  
1908, Nov. 14       Hearing for assessment for Drainage District No. 3.  
1908, Dec. 11       Contract with Dilley & Berdine signed.  
1912, Aug. 3       Letter from Clerk of the District Court to E.L. Marriage about fixing the upper end of the Drainage Ditch.  
1913, Jan. 7       Engineer's Report by S.B. Gardner - Drainage Ditch needs to be deepen to drain properly.  
1913, Aug. 3       Petition to change upper end of Drainage District from Station 352 to Station 476.  
1913, Aug. 9       Drain Bound - Bond for Costs  
1913, Oct. 7       Engineer's Report by S.B. Gardner - Cleaning from Station 80 to Station 338+50 and from Station 338+50 to Station 485.  
1913, Nov. 28       Notice published in "HARDIN COUNTY CITZEN" to covert the upper end of the Drainage District No. 3 from open ditch to tile.  
1913, Dec. 16       Claim of Damages - \$1000  
1913, Dec. 17       Claim of Damages - \$1000  
1913, Dec. 22       Claim of Damages - \$300  
1913, Dec. 22       Claim of Damages - \$500  
1913, Dec. 22       Claim of Damages - \$1000  
1913, Dec. 22       Claim of Damages - \$1000  
1913, Dec. 22       Claim of Damages - \$200  
1913, Dec. 27       Hearing for the notice for drain district and drain to covert the upper end of the Drainage District No. 3 from open ditch to tile.  
1913, Dec. 29       Received list of damages for the reconstruction of the Drain District No. 3.  
1914, Jan. 7       Engineer's Report by S.B. Gardner - Clean ditch from Station 80 to Station 315 & open ditch converted into closed drain from station 351 to station 185

1914, Jan. 7	Specifications for Drainage District No. 3. Improvements
1914, Jan. 7	Agreement to Pay Damages on Account of Ditch.
1914, Jan. 12	Notice to Contractors for reconstruction of Drainage District No. 3.
1914, Jan. 15-22	Notice to Contractors for reconstruction of Drainage District No. 3 published in "The Eldora Herald"
1914, Feb. 3	Bids to be open for reconstruction of Drainage District No. 3
1914, Feb. 3	Contract for Construction of Drains
1914, Feb. 3	Proposal Bond \$2300 from Lion Bonding Surety Co.
1914, Feb. 21	Tile Contract - What Cheer Clay Products Company - \$11607.50
1914, Mar. 7	Loin Bonding & Surety County Bond No. 26218 - \$1000
1914, Mar. 7	Drain Tile Bond - \$2902
1914, Jun. 3	Letter to William & Huff, Attorneys from What Cheer Clay Products
1914, Jun. 3	Letter to O.L. Olson (winning bidder for drainage work) from Williams & Huff (attorneys)
1914, Jun. 11	Letter to O.L. Olson (winning bidder for drainage work) from William & Huff (attorneys) - demanding work to start on the 20th or forfeit the contract.
1915, Jan. 13	Notice of Labor Lien on improvement in Drainage District No. 3.
1915, Feb. 8	Final Settlement with What Cheer Clay Products having completed their contract.
1915, Feb. 15	O.L. Olson has sublet a portion of his contract to Hogan & Badgerow.
1915, Apr. 1	Warrant Issued.
1915, Mar. 12	O.L. Olson assign \$768.00 to E.P. Davis for completion of Contract.
1915, Mar. 20	Notice of Claim and Lien by H.A. Kline on Drainage Ditch No. 3.
1915, Apr. 1	Lion Bonding & Surety County No. 12775 - \$1000
1915, Apr. 21	S.B. Gardner resigns as Engineer in charge
1915, May 5	E.W. Edwards (civil engineer), William Dunning and J.B. Starr Jr. were appointed Commissioners to assess benefits on the repair of drainage district No. 3
1915, Jul. 2	Official Bond No. 38488 - \$1000 - the Fidelity & Deposit Company of Maryland.
1915, Jul. 2	Final Report by Engineer G.B. Gardner - E.W. Edwards appointed engineer in charge.
1915, Sep. 29	Subcontract accepted from O.L. Olson to Hogan & Badgerow.
1915, Oct. 18	Engineer (E.W. Edwards) does not recommend that the work be accepted and steps need to taken to make him complete the work.
1915, Dec. 16	E.W. Edwards resigns as Engineer for Drainage District.
1915, Dec. 17	W.S. Porter was appointed Engineer for Drainage District.
1916, Jan. 1	Official Bond - W.S. Porter Construction Engineer \$500
1916, Apr. 17	Commission to inspect Drainage District - W.S. Porter
1916, Jun. 8	Notice to Proceed with work on "Cleanout Work " to O.L. Olson (principal contractor) or show cause why the work should not be relet.
1916, Jun. 13	O.L. Olson was request to appear before the board to show cause why the work should be delayed, if not it would be relet for bid.
1916, Jun. 16	Notice to Contractors for reconstruction of Drainage District No. 3.
1916, Jun. 29	Notice to Contractors for reconstruction of Drainage District No. 3 published in "The Eldora Herald"
1916, Jul. 10	Proposal on Drainage District No. 3 - received.
1916, Jul. 12	Notice to Contractors for reconstruction of Drainage District No. 3.
1916, Jul. 13-7	Notice to Contractors for reconstruction of Drainage District No. 3 published in "The Eldora Herald"

1916, Jul. 27	Proposal on Drainage District No. 3 - received.
1916, Jul. 27	Contract for Construction of Drains - A.S. White - \$10,150.00
1916, Jul. 27	Contractor's Drainage Bond - A.S. White - \$2,536.00
1916, Dec. 28	Engineer's Report - W.S. Porter - Bulk-head at tiles ends is being undermined and needs to be replaced.
1916, Dec. 28	Engineer's Report - W.S. Porter - C.R.I & P Railway put piling through 28" tile line and destroyed the drain. Company to attended to this matter at once.
1916, Dec. 29	District Court of Iowa - Lion Bonding & Surety Co. pay \$1,724.00 for bond NO. 27618
1917, Aug. 6	Engineer's Report - W.S. Porter - Reconstruction work by A.S. White has been completed - full payment of \$10,150.00
1917, Aug. 8	Official Bond - W.S. Porter - Preliminary Engineer - \$1000 - for Drainage District No. 3.
1917, Aug. 17	Petition for Drainage District and Drain - Sections 31 & 32, Township 89 North, Range 20 West.
1917, Nov. 8	Engineer's Report - W.S. Porter - unfinished construction on the land of Mr. Geo. Robertson, to be fix at once.
1918, May 25	Court Decree - Plaintiffs: Lois W. Bloomquist and Fannie W. Emeny VS. Board of Supervisors and Drainage District No. 3 - Findings - Reduce assessments by 33 1/3%
1932, Jul. 30	Engineer's Report - J.R. Mahur - repairs need for Drainage District No. 3 in Section 27, Township 89 North, Range 21 West. - Remove trees, fix tiles and Bulk heads.
1943, Jul. 21	Request for Drainage Repairs - The open ditch from the tile outlet be cleaned.
1945, Apr. 3	Contract - Drainage Cleanout - Howard O. Young (contractor) - \$4,000.00
1956, Dec. 17	Engineer's Report - F.J. Reigles - Recommend tree removal, stumps be sprayed and some clean out work be done - estimate \$2,000.00.
1956, Dec. 18	Notice to Bidders - Clearing trees, brush and cleaning out Drainage District No. 3.
1956, Dec. 28	Notice published in "THE HARDIN COUNTY INDEX" for Bidders on Clearing trees, brush and cleaning out Drainage District No. 3.
1957, Jan. 9	Minutes of Board Meeting - Accepted A.L. Bock bid of \$3,802.87 solely for trees and Brush removal and did not include cleaning out the ditch.
1957, Dec. 23	Contract for Excavation- Wesley McDaniel - Excavate 800 Cubic Yards in Section 7, Township 88 North, Range 20 West - \$480.00
1958, Feb. 3	Contract for Excavation - Wesley McDaniel - Excavate 500 Cubic Yards in Section 8, Township 88 North, Range 20 West - \$375.00
1958, Mar. 4	Minutes of Board Meeting - \$6,000.00 was deemed necessary to pay for completion of repairs to Drainage District No. 3 and assessment of 30%.
1983, Apr. 1	Notice of Drainage Hearing - Hollis E. Ryken (Engineer) - recommends repairs or improvement to Drainage District.
1983, Jun. 30	Notice for Construction of Drainage Repair - (Main Open Channel) Clear, spray and dispose of all brush and trees in drainage ditch.
1983, Jun. 30	Notice published in "THE ACKLEY WORLD-JOURNAL" for Construction of Drainage Repair of Drainage District No. 3.
1983, Oct. 19	Engineer's Report - Hollis E. Ryken - Repairs are needed to Drainage District No. 3
1983, Nov. 28	Notice of Report by Hollis E. Ryken (Engineer) - regarding repairs of Drainage District No. 3.

1983, Dec. 7	Notice published in "THE IOWA FALLS CITZEN" regarding repairs of Drainage District No. 3.
1984, Jan.	Notice to Contractors - for restoration of 0.4 miles to Drainage District No. 3.
1984, Jan. 18-25	Notice published in "THE IOWA FALLS CITZEN" regarding construction repairs to Drainage District No. 3 - restoration of 0.4 miles.
1984, Apr. 7	Petition - Request to proceed to advertise for bids on the repairs that Hollis E. Ryken stated in his October 19, 1983 Engineer's Report.
1984, Apr. 12	Proceeding of Trustees - No bids were received for construction repairs to Drainage District No. 3 - "Latch Outlet" in Section 8, low bid was Robert Gherke \$2,750.00
1984, Apr. 25	Drainage District No. 3 Clerk's Record, Proceedings of Trustees - Center of Section 7 - Blown out tile lines, Trees growing over tile & surface water cutting ground - Robert Gherke to repair for \$1,500-\$1,700 - Bank wash out repair on the M.G. Clark farm at district expense - tree cutting is into penalty period - DD #149 has received no bids and would have to use other less expensive means.
1996, Aug. 19	Board of Trustees Meeting Held - maintain 5-year interval spraying the ditch
1997, Dec. 22	Board of Trustees Meeting Held - Sub 1 repairs made on Bernie Miller farm - Main tile checked for cotton wood roots (found) - \$280.41 - Repair blow out D.D. 3 main tile - Meade Martlett farm Section 28, Alden Township - \$341.54 - Removing Silt for D.D. 3 main ditch at Sub 149 main tile outlet - \$525.0 - Bill from Control Services Inc. Spraying brush along length of D.D. 3 - \$3,900.00 - Assess D.D. 3 \$8,000 to pay outstanding bills.
1998, Dec. 17	Board of Trustees Meeting Held - Repair Blow sub district #111 - \$234.60 - Tile repair of sub district #64 - \$745.35 - Place Concrete rip-rap on Main ditch bank of D.D. 3 Thelke farm Section 1, Ellis Township - \$1,672.5 - Purchase 15 feet of tile to repair sub district #64 - \$70.50 - Levy sub district #64 \$1,100.00

3.0 **INVESTIGATION** – Review of the district history indicates that the Main tile of Drainage District 3 has had few previous repairs. It is assumed that there have been more repairs, but the details of them have just been lost to time. The field investigation for this report was performed at the request of the Drainage District Trustees. Said investigation was limited to visual observation (with limited excavation) along with survey data, and pictures gathered. During the investigation, there were 5 sinkholes found on the Main tile along with the Main tile being in various states of collapse over the course of  $4,745 \pm$  feet. For reference, a copy of the observation report with pictures is included in Appendix A and a map showing the investigation limits is included in Appendix B.

4.0 **DISCUSSION AND CONCLUSIONS** – Based on the above, it is obvious that the existing Main tile, in the area of investigation is in various states of collapse and is restricting drainage capacity in the area. If repairs or improvements are not performed, the Main tile will continue to have poor drainage performance, the upstream landowners will continue to experience overland flow, ponding, and additional sinkholes will form over the Main tile. This will continue to affect productivity of the farmed ground upstream of these issues and will get worse as the tile ages. When all these issues are combined, it will lead to further reduced drainage and liability exposure by the drainage district.

5.0 **REPAIR METHOD** – To repair the existing Main tile, the following option is the most straight forward available:

**Partial Tile Replacement**

- Remove and replace the entire Main tile for the entire investigation limits with new Main tile of equal or comparable size.
- Typically, the replacement Main tile would be in the same location as the existing Main tile in order to locate and reconnect private tile and district lateral tile. For reference, the route and locations are shown on the map included in Appendix B.

With the above-mentioned repair method, the following should be noted:

- The pipe sizes used are those that are currently manufactured that most closely meet or exceed the current Main tile size.
- The Partial Tile Replacement option would allow for lower maintenance costs in the future as the entire Main tile is new.
- The Partial Tile Replacement option would remove all soil and debris in the existing Main tile.
- Repairs have historically been viewed as not having an impact on jurisdictional wetlands. As such, individual landowners should consult with applicable staff at the Hardin County NRCS offices to verify the existence of said jurisdictional wetlands and that there will be no impact on them.

Per Iowa Code Chapter 468.126, any of the above actions that do not increase capacity would be considered a repair. As such, Subsection 1, paragraph c of Chapter 468.126 states "If the estimated cost of the repair does not exceed fifty thousand dollars, the board may order the work done without conducting a hearing on the matter. Otherwise, the board shall set a date for a hearing . . ." The opinion of probable construction cost contained in the next section of this report exceeds said \$50,000 limit. Therefore, a hearing will be required. Per Iowa Code Chapter 468.126.1.g, the right of remonstrance does not apply to the proposed repairs.

6.0 **IMPROVEMENT METHOD** – To improve the drainage capacity for the existing Main tile, the following option is the most straight forward available:

**Open Ditch**

- Remove and replace 4,745± feet of the Main tile with a Main Open Ditch.
- Typically, the Main Open Ditch would be in the same location as the existing Main tile in order to locate and outlet private tile and district lateral tile. For reference, the route and locations are shown on the map included in Appendix B.
- Outlet all private and lateral tile encountered to discharge into the Main Open Ditch.

With the above-mentioned possible improvement, the following should be noted in addition to the notes in repair methods section:

- This option would probably involve obtaining of right of way.
- The replacement of the Main tile with a Main Open Ditch increases drainage capacity, which has traditionally fit the Iowa Code definition of improvement. However, the replacement is not being suggested to increase drainage capacity, but is being offered solely to extend the lifecycle of the district facility and the original design for the Main in this area was an open ditch. Legal counsel should be consulted to provide advice concerning this.
- If this option is deemed a repair by legal counsel, repairs have historically been viewed as not having an impact on jurisdictional wetlands. As such, individual landowners should consult with applicable staff at the Hardin County NRCS offices to verify the existence of said jurisdictional wetlands and that there will be no impact on them.
- If this option is deemed an improvement by legal counsel, improvements have historically been viewed as having an impact on jurisdictional wetlands. As such, individual landowners should consult with applicable staff at the Hardin County NRCS offices to verify the existence of said jurisdictional wetlands and what said impact may be on them.

If legal counsel considers the above option a repair, it is our opinion that the following is applicable. Subsection 1, paragraph c of Chapter 468.126 states "If the estimated cost of the repair does not exceed fifty thousand dollars, the board may order the work done without conducting a hearing on the matter. Otherwise, the board shall set a date for a hearing. . ." The opinion of probable construction cost contained in the next section of this report exceeds said \$50,000 limit. Therefore, a hearing will be required. Per Iowa Code Chapter 468.126.1.g, the right of remonstrance does not apply to the proposed repairs.

If legal counsel considers the above option an improvement, it is our opinion that the following is applicable. Subsection 4, paragraph c of Chapter 468.126 states "If the estimated cost of the improvement does not exceed fifty thousand dollars, the board may order the work done without conducting a hearing on the matter. Otherwise, the board shall set a date for a hearing on whether to construct the proposed improvement and whether there shall be a reclassification of benefits for the cost of the proposed improvement." The opinion of probable construction cost contained in the next section of this report exceeds said \$50,000 limit. Therefore, a hearing will be required. Per Iowa Code Chapter 468.126.4.e, the right of remonstrance may apply to the proposed improvements.

7.0 **OPINION OF PROBABLE CONSTRUCTION COSTS** – Using the above methods of repair and improvement, an itemized list of project quantities and associated opinions of probable construction cost for each option were compiled and are included in Appendices C and D of this report. A summary of said costs are as follows:

METHOD	TOTAL COST	CONSTRUCTION COST	ROAD CROSSING COST
Repair - Partial Tile Replacement	\$479,758.44	\$444,395.94	\$35,362.50
Improvement - Open Ditch	\$584,667.19	\$409,780.94	\$174,886.25

It should be noted that said costs include materials, labor, and equipment supplied by the contractor to complete the necessary repair or improvement and include applicable engineering, construction observation, and project administration fees by Clapsaddle-Garber Associates. However, said costs do not include any interest, legal fees, county administrative fees, crop damages, other damages, previous repairs, engineering fees to date, wetland mitigation fees, or reclassification fees (if applicable). As always, all costs shown are opinions of Clapsaddle-Garber Associates based on previous lettings on other projects. Said costs are just a guideline and are not a guarantee of actual costs.

8.0 **OWNERSHIP AND CLASSIFICATIONS** – Any and all information concerning ownership of lands and classifications of said lands within Drainage District No. 3 can be obtained from the Hardin County Auditor's office.

It should be noted that Iowa Code Chapter 468.65 states "When, after a drainage . . . district has been established . . ." and ". . . a repair . . . has become necessary, the board may consider whether the existing assessments are equitable as a basis for payment of the expense of . . . making the repair . . ." and "If they find the same to be inequitable in any particular . . . they shall . . . order a reclassification . . ." Based on this, it is our opinion that a reclassification may be required if the repair were to move forward.

It should also be noted that Iowa Code Chapter 468.131 states "When an assessment for improvements . . . exceeds twenty-five percent of the original assessment and the original or subsequent assessment . . . did not designate separately the amount each tract should pay for the main ditch and tile lateral drains then the board shall order a reclassification . . ." Based on this, it appears that a reclassification separating laterals may be required if any of the above options were deemed to be an improvement, said improvement were to move forward, and the laterals had not already been separated. Since the proposed project does not involve the laterals, it is not clear if this portion of code is applicable, and it is our recommendation that the District Trustees seek advice from their legal counsel.

9.0 **RECOMMENDATIONS** – There is a definite need to perform one of the above-mentioned actions. The actions would remove the current restrictions to the Main tile and extend the lifespan of the same. Therefore, it is recommended that the District Trustees, should take action to accomplish the following:

- Approve the Engineer's Report as prepared by Clapsaddle-Garber Associates.
- Seek advice from legal counsel as to whether the Open Ditch alternative is a repair or improvement.
- Hold the required hearing on the proposed repair or improvement.
- Adopt one of the recommendations of the Engineer's Report.
- Direct plans and specifications for the proposed repair or improvement be prepared by Clapsaddle-Garber Associates.
- Proceed with receiving bids from interested contractors by Clapsaddle-Garber Associates.
- Award contract to the lowest responsible contractor.
- If desired or required by Iowa Code, proceed with reclassification proceedings after seeking legal advice concerning the same.

CONSTRUCTION ENGINEERING

1 OF \_\_\_\_\_

SHEET NO.

DESCRIPTION OF WORK AND MATERIAL USED FOR EACH OPERATION, INCLUDING CONTRACTOR/SUB NAME, ITEM NO. AND LOCATION

10:30 a.m. = Arrived at job site after locating control points and setting up GPS on C.P.T # 34. Checked into CPT # 38. Horizontal was good but vertical was off 0.23.

10:44 a.m. = Crew was exposing tile at Northern most sink hole, in surface ditch. 26" VCP removed, 1 section, took pictures upstream and down and shot top pipe. GPS Pt # 5550. Contractor replaced tile and placed fabric over joints.

11:00 a.m. = Met foreman at Southern most sink hole, which had been excavated previously. Point # 5551, took pictures, tile was completely collapsed upstream and downstream.

11:34 a.m. = Contractor is excavating approximately 100' +/- North west of Northern most sink hole West of I Ave. Pt # 5552, Tile is broken and egg shaped upstream and downstream. Shot top of tile at sink hole # 5553, could not get pictures.

1:30 p.m. = Crew removed tile at Pt # 5554, tile 24"? broke into 3 pieces. 24" VCP upstream and downstream broke, and beginning to collapse.

1:35 p.m. = Crew is excavating further West. 24" VCP at Point # 5555 is oval shaped upstream and downstream. Took Pictures

2:00 p.m. = Discovered another sink hole, South of fence line and West of Pt # 5555. shot top of pipe # 5556 and took pictures.

2:30 p.m. = Crew excavated West of # 5556. Located tile end removed 1 section, Pt # 5557. 24" VCP appears to be in good condition looking West, possible 1 section cracked, the rest are in good condition as far as I could see. Looking East 24" VCP is oval shaped as far as visible. Not collapsing.

I Certify that the work described in this report was incorporated into this contract unless otherwise noted.

SHEET NO.

DESCRIPTION OF WORK AND MATERIAL USED FOR EACH OPERATION, INCLUDING CONTRACTOR/SUB NAME, ITEM NO. AND LOCATION

2:45 p.m. = Shot pts # 5558 and # 5559 directly South west of intake structure with sink hole around. UPS shots are top of 24" and 18" VCP connected to structure which has settled 0.5' to 0.75'. Structure is in very bad shape, may have originally had a bee hive intake now missing.

3:45 p.m. = Shot top of pipe at sinkhole. Pt # 5560, could not get pictures.

4:00 p.m. = Crew exposed tile West of railroad Row, and removed 1 section, section was cracked and broke into several pieces during removal. Pt # 5561 top 28" VCP? VCP is oval shaped both directions from # 5561, as far as C.O. could see. Crew repaired tile with 24" dual wall HDPE, placed fabric over joints and tile bats over new tile.

Left for day and tore down C.P.S.

I Certify that the work described in this report was incorporated into this contract unless otherwise noted.

In the 2 ovals, there are several sinkholes.

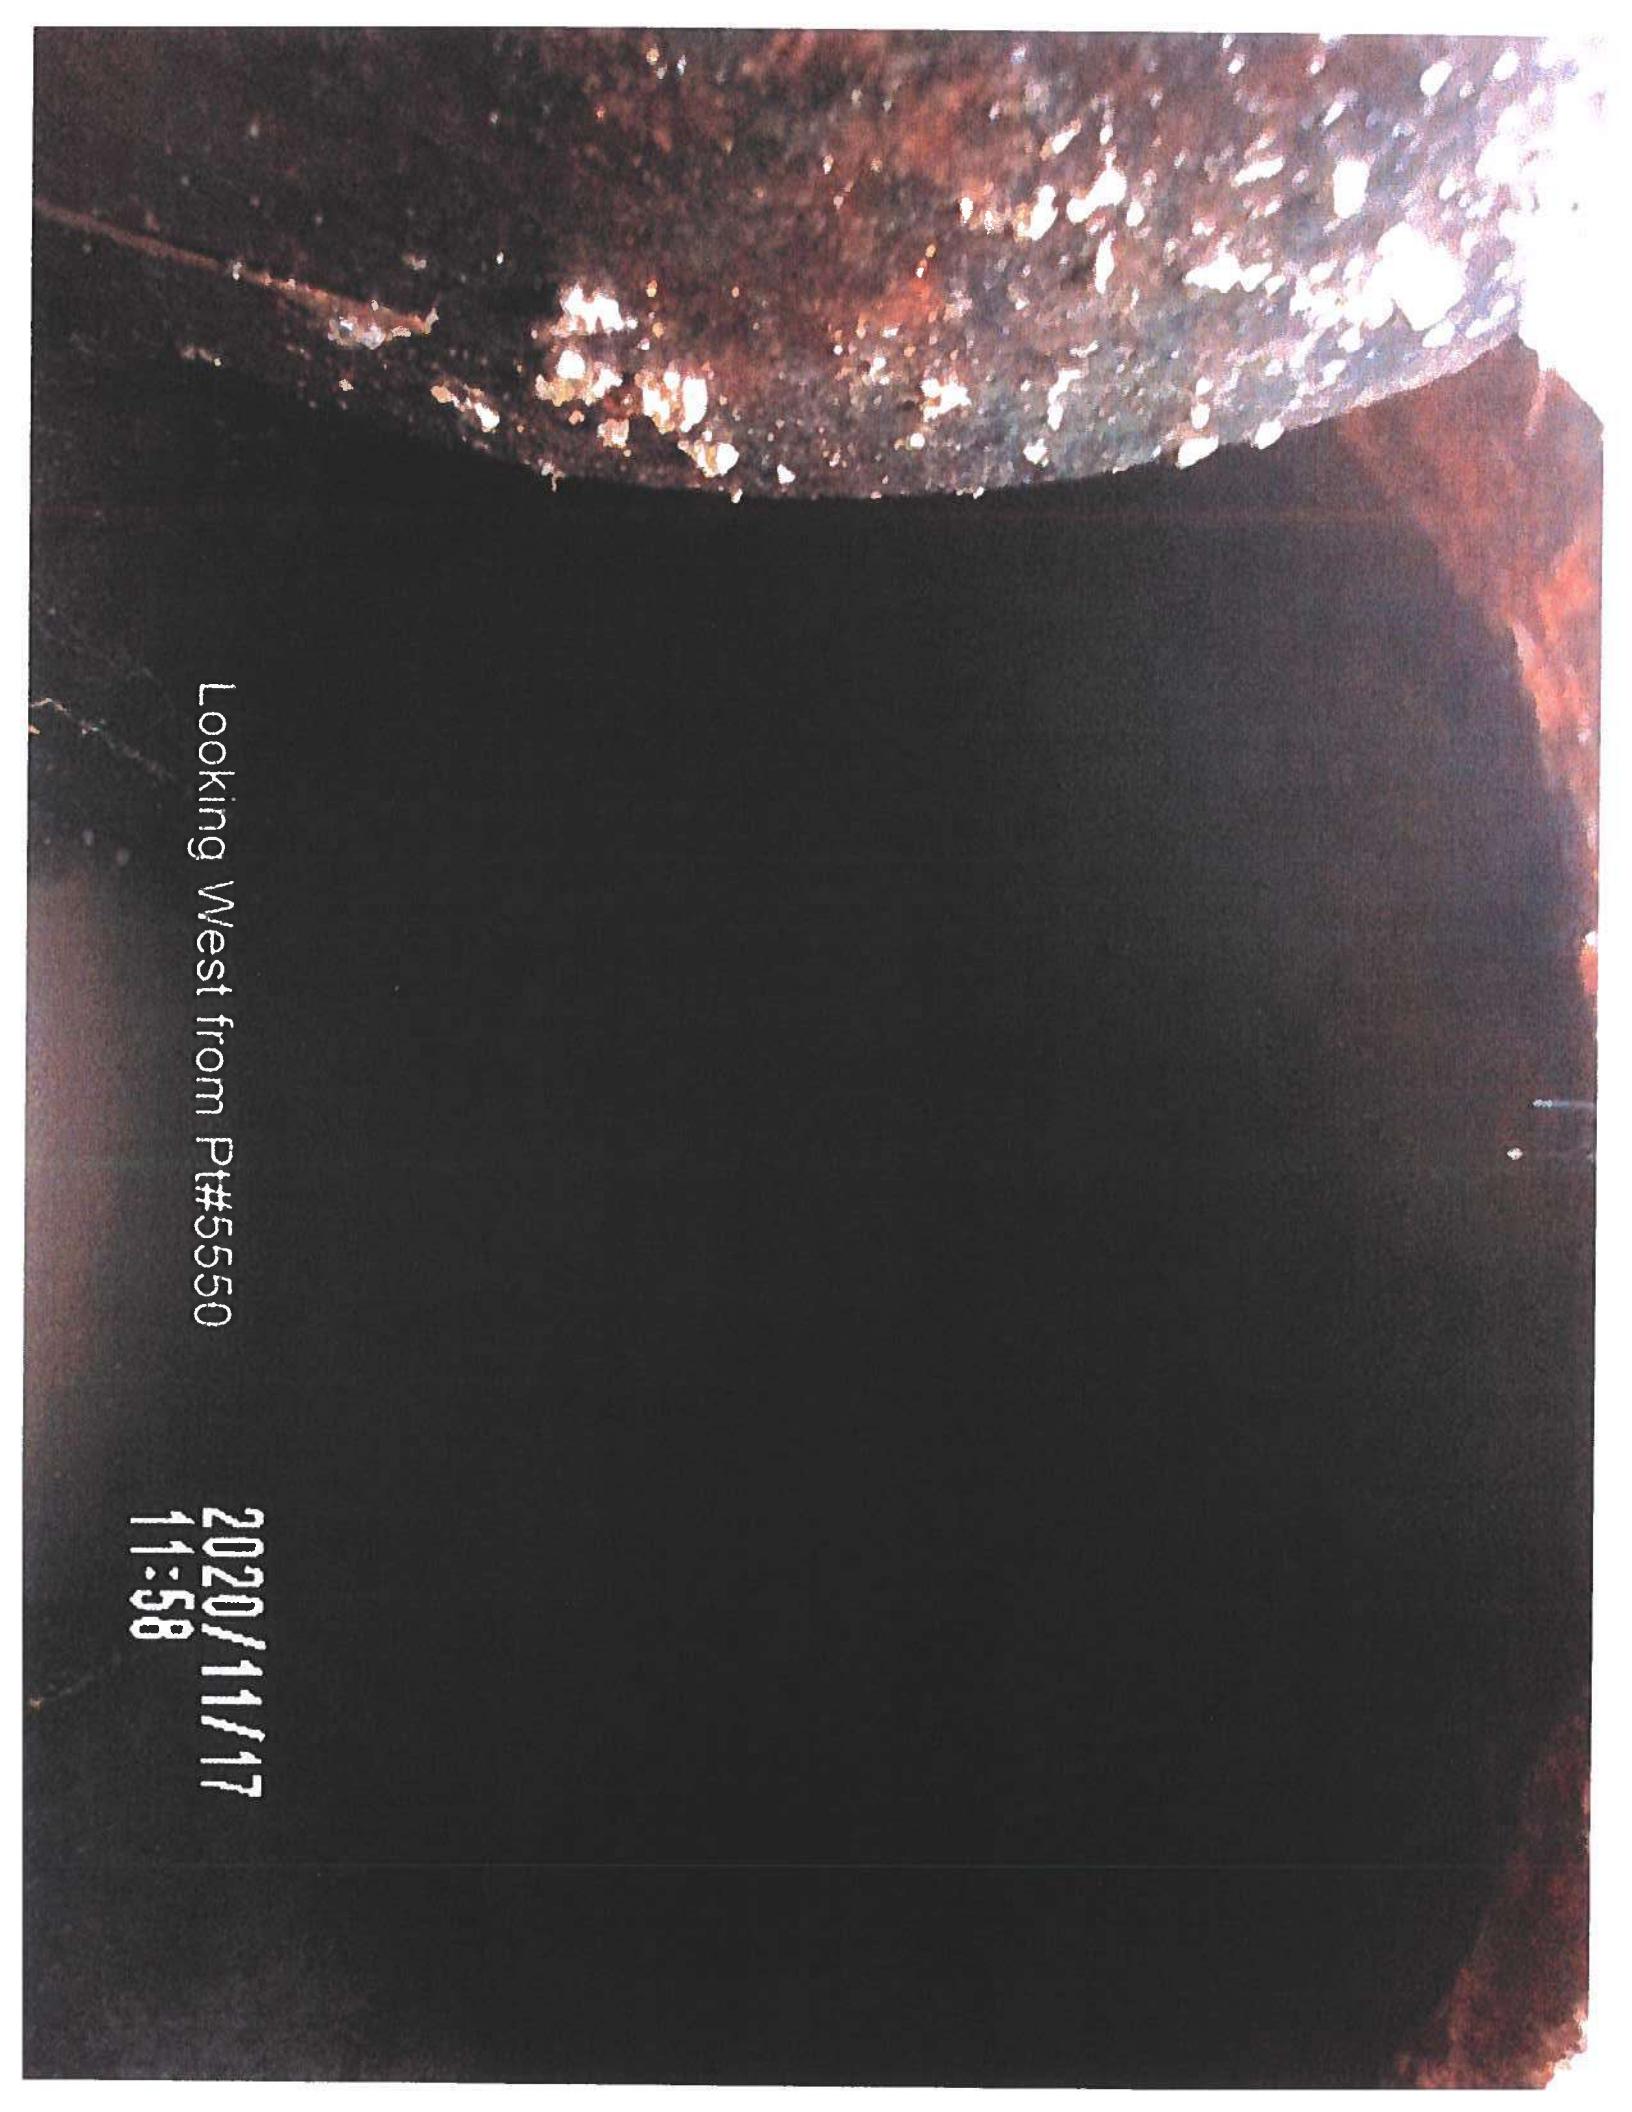

1. Gehrke is on-site and planning to do some exploratory outside of the farthest out sinkholes so that we can determine the approximate limits of replacements. Hoping to only spend 1 day, but not sure how far out we will need to go. Get shots on the tile and pictures up and down the pipe.

2. If there is time, get shots/pictures at each sinkhole. We shouldn't need anything at them or in between them.

3. Use 6490 survey job.

An aerial photograph of a river scene. A bridge spans the river, with several support piers visible in the water. On the left bank, there is a large industrial facility with multiple tall, thin smokestacks emitting plumes of white smoke. The surrounding area appears to be a mix of industrial land and some greenery. The water in the river has a dark, reflective surface.

## **Revised Reclassification Commission Report, Drainage District 3 Hardin County, Iowa**

- 1.0 **INTRODUCTION** - The District Trustees appointed a Reclassification Commission to reclassify the lands within the drainage boundaries of Drainage District 3. For reference, the Certificates of Oath of Commissioners are included in Appendix A. Although there are several other laterals, subdistricts, and/or districts within the drainage boundaries of Drainage District 3, this reclassification was limited to Drainage District 3 only. This action by the District Trustees was a result of comments received from landowners in the upper end of the watershed at the hearing held on the Engineer's Report on Vegetative Growth and Siltation in Main Open Ditch. This report will summarize the background information gathered and the evaluation process used by the Commissioners to reclassify said lands and also present the resulting reclassification.

2.0 **BACKGROUND INFORMATION** - In addition to reviewing lands within the drainage district, the Reclassification Commission also looked at the following supporting documents supplied by Ryken Engineering:

- Existing Classification from the Hardin County Drainage Clerk
- Soil Surveys from USDA website
- Maps of Drainage District Boundaries and Facilities from the Hardin County Drainage Clerk
- Aerial/Tract Maps from the Hardin County GIS website
- Recorded Boundary Surveys from the Hardin County Recorder's Office

Using the above information, the Reclassification Commission gathered the following background information:

- 2.1 **Tract Verification** - This step involved verification that each tract number to be reclassified was appropriately sized (i.e. 40 acres or less according to recognized or legal divisions) in the existing classification. For those that weren't, additional tract numbers were created.
- 2.2 **Acreage Verification** - This step involved verification of the acreages contained within the existing classification. For the tract numbers that previously had acreages stated, the acreage was compared to that available from the GIS website or recorded boundary surveys and corrected as necessary.
- 2.3 **Acreage Generation** - This step involved generation of the acreages for all the remaining tract numbers (i.e. those without acreages previously stated in the existing classification or those created in the Tract Verification process above). For lands whose tract numbers were totally contained within the Drainage District boundaries, the acreage from the GIS website or recorded surveys was used. For lands whose tract numbers were partially contained within the Drainage District boundaries, the acreage was measured from a composite overlay of the maps of Drainage District boundaries with the property lines from the GIS website.
- 2.4 **Soils Type Determination** - This step involved differentiation of the soil types based on their properties (i.e. very poorly drained, poorly drained, well drained, and excessively drained), and the percentage of each within each tract number. This was measured from a composite overlay of the soil surveys with property lines from the GIS website.
- 2.5 **Proximity Determination** - This step involved determination of the proximity or distance to the main district facilities (i.e. main tile or main open ditch). All distances were measured from the approximate centroid of each tract number along the shortest straight line route to the main district facility. Each tract number was measured either to the main tile or the main open ditch, whichever was closest. This was measured from a composite overlay of the maps of Drainage District facilities with the property lines from the GIS website.

3.0 **EVALUATIONS** - Using the above background information, the Reclassification Commission evaluated and determined benefits using in the following method:

- 3.1 **Soil Factor** - This factor was calculated as an indication of the "need" for the drainage district facilities based upon the natural soil characteristics for each tract number. It was the weighted total of the soil types after placing the following percentage values upon each soil type:
- Very Poorly Drained = 85%
  - Poorly Drainage = 55%
  - Well Drained = 10%
  - Excessively Drained = 0%

These percentages were based upon the Reclassification Commission's determination that the Excessively Drained soils typically did not require the Drainage District facilities to be productive, the Well Drained soils typically needed very little of the Drainage District facilities to be productive, and the Poorly Drained and Very Poorly Drained soils typically relied heavily on the Drainage District facilities to be productive.

- 3.2 **Tile Proximity Factor** - This factor was calculated as an indication of "availability" of the main tile based upon the distance each tract number was from said tile. Since there was a large range in the distances measured ( $100\pm$  feet to  $10,600\pm$  feet), this factor was necessary to compare the tract numbers relative to each other. Therefore, the tract number which had the farthest measured distance received a Tile Proximity Factor of 10 and the tract number which had the closest measured distance received a Tile Proximity Factor of 100. All other tract numbers received a Tile Proximity Factor calculated in proportion to this range based upon their measured distance.
- 3.3 **Open Ditch Proximity Factor** - This factor was similar to the Tile Proximity Factor (above) and was calculated as an indication of "availability" of the main open ditch based upon the distance each tract number was from said main open ditch. Since there was a large range in the distances measured ( $10\pm$  feet to  $12,800\pm$  feet), this factor was necessary to compare the tract numbers relative to each other. Therefore, the tract number which had the farthest measured distance received an Open Ditch Proximity Factor of 10 and the tract number which had the closest measured distance received an Open Ditch Proximity Factor of 100. All other tract numbers received an Open Ditch Proximity Factor calculated in proportion to this range based upon their measured distance.
- 3.4 **Combined Factor** - This factor was the composite of the above three factors (i.e. Soil Factor, Tile Proximity Factor, and Open Ditch Proximity Factor). Since this project was a repair to the main open ditch, the Reclassification Commission felt it benefited the tract numbers on the main open ditch more than those on the main tile. Therefore, the Combined Factor was calculated as follows:

$$(Open\ Ditch\ Proximity\ Factor + 60\% \ of\ Tile\ Proximity\ Factor) \times Soil\ Factor$$

Once the Combined Factor was determined, it was used as an indication of benefit received (i.e. the tract number with the highest Combined Factor was the closest to the main open ditch and had the soils in most need of the district facilities).

3.5 % Benefit - This is the benefit each tract number receives using the Combined Factor based on a scale of 100 (i.e. the highest Combined Factor is 100 and all other Combined Factors are calculated in ratio to that).

3.6 Units Assessed - This combines the amount of benefit along with the land area that is benefitted. For each tract number, this is calculated as:

$$\% \text{ Benefit} \times \text{Number of Acres} \times 100$$

3.7 % Units Assessed - This is the percentage of units assessed for each tract number as a portion of the total units assessed for the entire drainage district. Unlike the % Benefit which was a percentage comparing each tract number to the most benefitted tract number, the % Units Assessed compares each tract number to the total of the Drainage District.

3.8 Percent Levy - This is an indication of the levy amount necessary to pay for current project. For this report, it is at 100%, but will be adjusted as needed in the future by the Drainage Clerk to pay for future bills.

3.9 Assessment for Project (entire tract basis) - This is the amount that each tract number must pay in total to cover 100% of the levy. It is important to note that it has been calculated using the cost from the opinion of probable construction cost contained in the above mentioned Engineer's Report on Vegetative Growth and Siltation in Main Open Ditch. For each tract number, this is calculated as:

$$\% \text{ Units Assessed} \times \text{Probable Construction Cost} \text{ (i.e. \$705,120)}$$

3.10 Assessment for Project (per acre basis) - This is the amount that each tract number must pay per acre to cover 100% of the levy. Although this was not used in an active role by the Reclassification Commission, some landowners find it to be valuable information. It is important to note that it is calculated using the cost from the opinion of probable construction cost contained in the above mentioned Engineer's Report on Vegetative Growth and Siltation in Main Open Ditch. For each tract number, this is calculated:

$$\text{Assessment for Project (entire tract basis)} / \text{Number of Acres}$$

4.0 **EXCEPTIONS:** - With any process, there are inevitably exceptions and this reclassification was no different. While the above method was used for the vast majority of the tract numbers, the following are exceptions to the above process:

- 4.1 For tract numbers which are highly irregular in shape (i.e. long narrow pieces of land) or do not have accurate soil maps available, a Combined Factor was not calculated. Instead, the average of the Combined Factor for all the other tract numbers was used. The only tract numbers to which this applies are roadways and the airport (i.e. tract numbers 0.5, 1, 58.1, 130, 178, 233, and 417.2).
- 4.2 One landowner provided proof that subsurface tile drainage from his land and the neighbor's land did not flow to district facilities but flowed across the district boundary and discharged outside of the district. When this land was viewed by the Reclassification Commission, the majority of the ground surface sloped away from the district facilities and appeared to flow out of the drainage district. As a result, the Reclassification Commission felt the tract numbers at issue do not receive the same benefit as the other tract numbers in the district and felt a reduction was applicable. Therefore, the Combined Factor was reduced by 75% of what it would have normally calculated for these tract numbers. It was not reduced further as the Reclassification Commission felt there still may be potential unknown drainage benefits received, a small portion of the ground sloped towards the district facilities, and the Drainage District has fixed administrative costs. The only tract numbers to which this applies were tract numbers 2, 2.1, 3, 4, 5, 82, 84, 85, 147, and 377. At the March 14, 2016 Reclassification Hearing, the District Trustees decided to change the above mentioned reduction to 50%. The reclassification sheets in Appendix B have been revised to show this directive.
- 4.3 At the March 14, 2016 Reclassification Hearing, the District Trustees approved having the Reclassification Commission further study and determine which properties are located in and receive benefit from Drainage District 130 and to reduce their percentage of benefit accordingly (down to 0% if necessary). As a result, the Reclassification Commission reviewed several maps of Drainage District boundaries and facilities and determined that several tracts which were partially or entirely located within the boundaries of Drainage District 130 were also included in the reclassification for Drainage District 3. As a result, the "Number of Acres" and "% Benefit" were adjusted accordingly for these tracts. The only tract numbers to which this applies were tract numbers 8, 9, 256, 378, 378.1, 378.2, 379, 380, and 409.

5.0 **CONCLUSION:** - Using all the above, the Reclassification Commission generated reclassification sheets for the entire Drainage District. For reference, copies are included in Appendix B. It is recommended moving forward that the District Trustees, should take action to accomplish the following:

- Approve the Reclassification Commission Report.
- Hold the required hearing.
- Adopt the **Revised** Reclassification Commission Report as the basis for the project currently underway and all future repairs and improvements.

## REVISED CERTIFICATE

Lee Gallentine, a Professional Engineer of the State of Iowa, hereby certify:

That I, along with the other classification commissioners for Hardin County Drainage District No. 3, have personally examined and inspected lands within the Drainage District, have reviewed original maps of the Drainage District, aerial maps of the lands within the Drainage District, and soil maps showing soil types for the lands within the Drainage District.

That I, along with the other classification commissioners for Hardin County Drainage District No. 3, completed the classification of the lands within the Drainage District. Said classification has fixed the percentages of benefits in tracts according to the recognized and legal divisions of 40 acres or less using a graduated scale of benefits, numbered according to the benefit to be received, with the lands receiving the greatest benefit marked on a scale of 100 and those benefited in a less degree marked with such percentage of one hundred as the benefit received is in proportion to.

That I, along with the other classification commissioners for Hardin County Drainage District No. 3, performed said classification in accordance with Chapter 468, Code of Iowa, to the best of my ability, skill, and judgment. The attached list is the final determination of classification and assessment for each tract of land in the Drainage District for all repairs and future improvements to the facilities in the Drainage District. That this report is a true and correct transcript of said classification of lands and apportionments of benefits made by said classification commission.

	<p>I hereby certify that this land surveying document was prepared and the related survey work was performed by me or under my direct personal supervision and that I am a duly licensed Land Surveyor under the laws of the State of Iowa.</p> <p><i>Lee O. Gallentine, P.E.</i></p> <p>Lee O. Gallentine, P.E. DATE: <u>July 4, 2016</u> License Number: 15745 My License Renewal Date is December 31, 2016 Page or sheets covered by this seal: <u>All shown on Table of Contents</u></p>
